

ISA BROWN

The ISA Brown is recognised globally for its exceptional feed conversion, which makes it one of the most efficient, proven and profitable brown egg layers in the world.

Producing high numbers of first quality eggs, per hen housed, the ISA Brown is a reliable and versatile layer with excellent feed conversion, which adapts well to differing climates and housing systems.

Optimal egg size, strong shells and great laying persistency also make the ISA Brown perfectly suitable for longer laying cycles.

	Free Range	Colony
Eggs per hen housed to 72 weeks	316	330
Eggs per hen housed to 80 weeks	359	373
Average egg size to 72 weeks	65.8%	65.8g
Average egg size to 80 weeks	66.0%	66.0g
Egg mass to 72 weeks	20.3kg	21.1kg
Egg mass to 80 weeks	23.1kg	24.0kg
Average daily feed intake per bird	124g	115g
Body weight at 16 weeks	1350	1350
Liveability:		
Rearing	98.0%	98.0%
Laying period (72 wks.)	94.7%	95.8%
Laying period (80 wks.)	92.7%	95.9%
